Trap Setter #2

In this day of heavy traps and even heavier springs, some of us could use some help. This improved **Model #2** has an angle bent handle thus allowing the trap to be set on a flat surface. They are made from one piece of 12 ga. Steel and will fit most coil spring traps.

A Trapper to Trapper Hint:

A trappers tools painted fluorescent orange well ahead of the season are less likely to be left behind and are easier to find when they are missing.
